

AOS iOS Wallet Download Tutorial

I. Download TestFlight from Apple Store

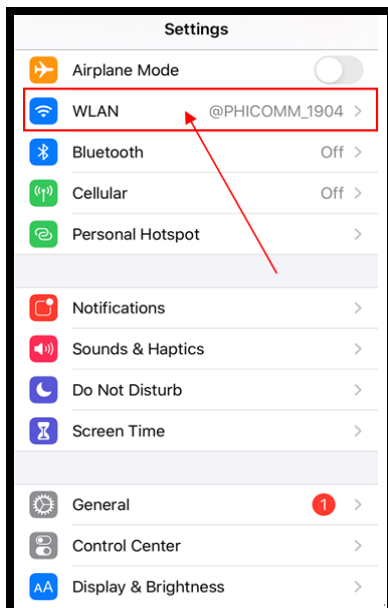

TestFlight download jump link: <https://apps.apple.com/cn/app/testflight/id899247664>

After TestFlight is downloaded, if a tip as shown in the picture below occurs:

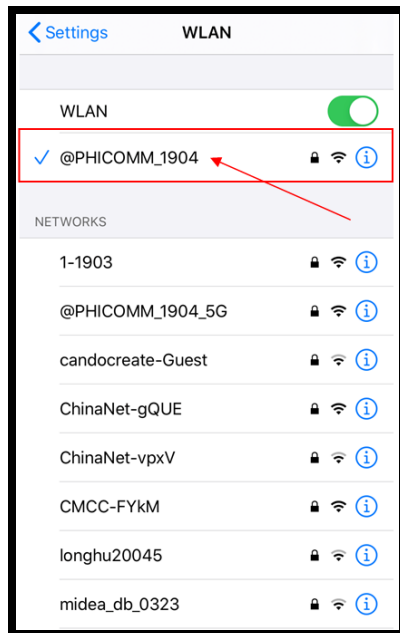

1. Can't load TestFlight

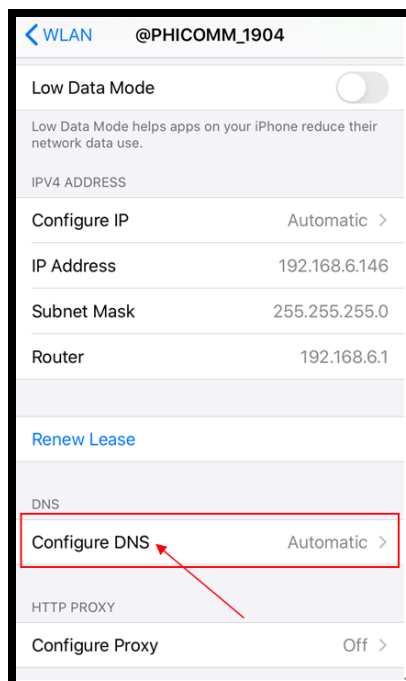

2. Solution: open phone settings and click WLAN. Shown below:

3. Connect to your WiFi and click. (Note: a relatively stable WiFi is suggested) Shown below:

4. Move downwards, find Configure DNS and click

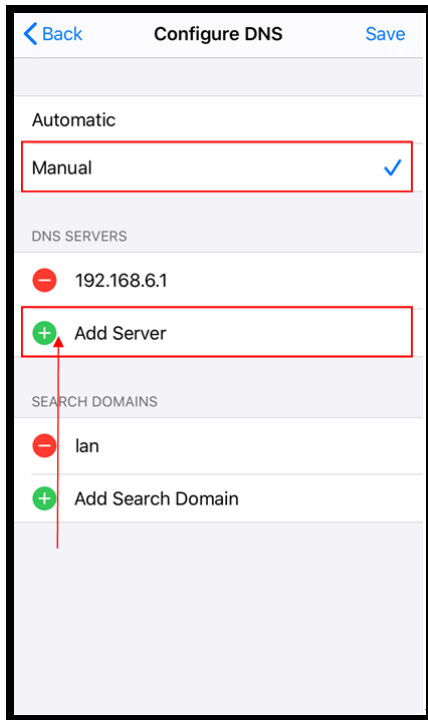

5. Enter Configure DNS, choose Manual, add the server address chosen from three addresses:

① 114.114.114.114

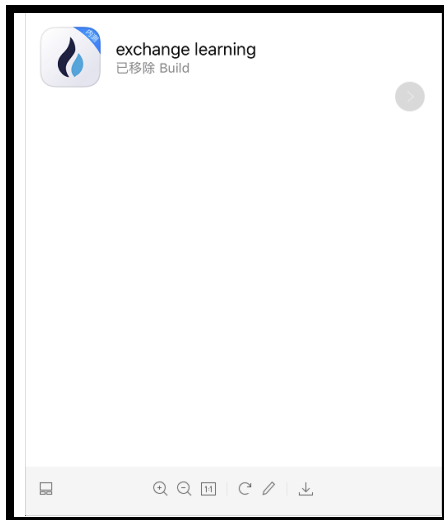

② 8.8.4.4

③ 223.5.5.5

Shown below:

6. Open TestFlight again. Connection successful.

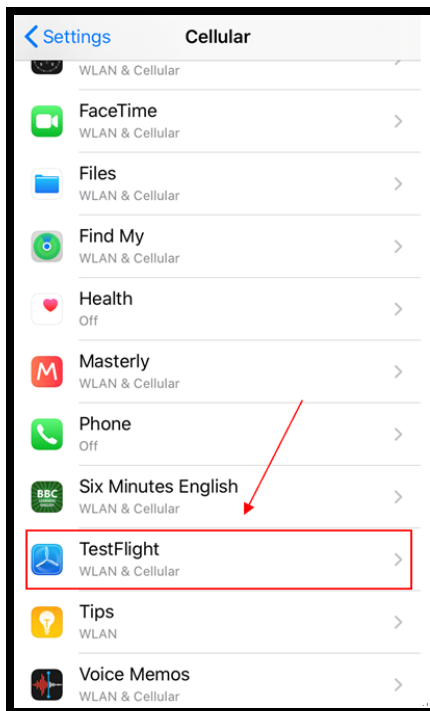

If TestFlight can't be loaded normally as per the above method, then please continue the configuration by following steps as below

I. Configure Cellular

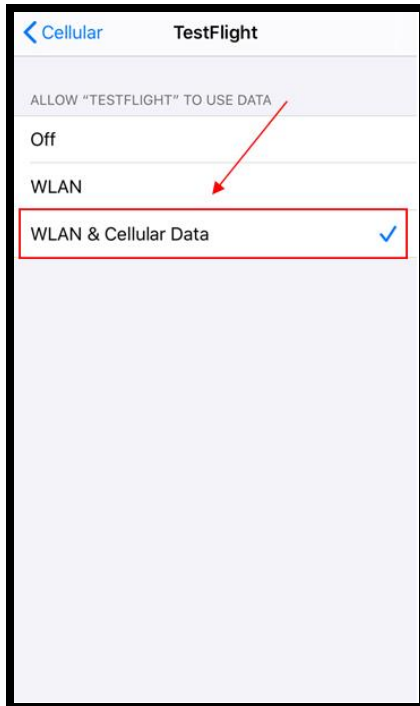

1. Enter IOS phone setting and click Cellular.

2. Enter Cellular, move downwards and find TestFlight. Click.

3. Choose WLAN & Cellular Data

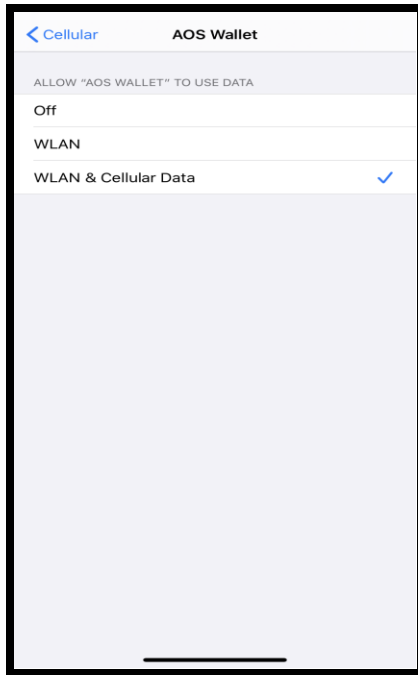

I. After downloading TestFlight and successful connection, download AOS IOS Wallet by scanning the QR code or through the jump link.

1. Wallet download link: <https://testflight.apple.com/join/ryEX5269>
2. QR code for downloading the Wallet:

3. After the Wallet is downloaded, please configure Cellular as per the method mentioned above.

IV. After configuration, create an account as per Wallet tutorial. Please check the tutorial on the official website for creation method.
